

Thank you for downloading our FREE printable for June 2007.

Printing...

Print these on cardstock, I use a tan parchment, but brown craft or even white will work perfectly. When printing, to insure the proper size, make sure you have "Auto Rotate & Center" CHECKED - and that "Page Scaling" is set to NONE. You do not want to have "Shrink to Fit Page" checked, as it will reduce the size of the finished tag (these options will appear in the print menu). Also choose only the page with the tag images to print. (example: print page 2 thru page 2)

Cutting...

Cut just inside the tag outline, so the lines won't show when you're finished.

Aging...

If you wish to give your tags a stained, aged look, you can do this with 1/2 t. of walnut ink crystals mixed in 2 c. warm water. You could also use a coffee or tea stain. If the ink in your printer is not colorfast you will have to age your cardstock first, otherwise the color will run. I use an Epson printer and Durabrite ink which will not run when it gets wet.

Finishing...

When your tags are dry, punch a hole in the center at the top of your tag. Tie a piece of homespun or jute and thread through the hole.

You can use an emory board or fine grit sandpaper to soften the edges of the tags if you wish.

We hope you enjoy using these Tags. Please check back next month for another free printable.
